SUMMARY

UI Developer, passionate about creating intuitive and responsive web applications. Skilled in both Frontend and Backend development, with a focus on user experience, clean code, and performance optimization. Continuously enhancing skills through practical projects and learning. Eager to contribute to a collaborative and innovative development team, and to grow professionally in a dynamic tech environment.

EDUCATION

Naresh IT
UI Full Stack with React

Hyderabad, Telangana
2025-2026

Govt. E. R. R. pg. Science College
Bachelor of Computer Applications (BCA) CGPA: 6.5 / 10

Bilaspur, Chhattisgarh
2021 – 2024

TEHKNICAL SKILLS

Front End: HTML, CSS, JavaScript, TypeScript, Bootstrap, MUI, SASS,

Libraries & Frameworks: React, jQuery

Server Side: NodeJS, ExpressJS

Database: MongoDB, MySQL

Platforms: Git, GitHub

Graphic Design: Photoshop

WORK EXPERIENCE

Software Engineer Intern at Techsharathi Consultancy

01-sep-2025

contributed to the Web development and modern frameworks. Collaborated closely with cross-functional teams in an Agile environment, participating in daily stand-ups, code reviews, and sprint planning while gaining hands-on experience in the complete software development lifecycle. Developed a strong understanding of professional practices, including version control with Git, clean code standards, teamwork, company ethics, and delivering production-ready features in a real-world corporate setting.

Projects

AstroSharathi -

Setup the environment with 'Vite' as a bundling tool and React as a framework then with the guidance and help of the seniors design multiple pages, bind the functionality with the backend API, make it fully responsive for all type of screens then perform testing, debugging and make a build file for deployment [Link](#)

SkinClaro-

Worked on frontend testing and debugging. Enhance the UI and suggested some improvements to make the website more attractive and user friendly [link](#)

VastuSharathi-

Resigned the existing website with the proper industry standard and good quality code. Enhance all the pages for the better UI and user experience.

Added a fully functional 'Customer Reviews' page by creating a new table in the database and creating the API in Python to perform the CRUD operation.

Added a Product section with fully functional ERP. Added all the required pages like Products, Wishlist, Cart, Orders including razor pay with the existing Admin panel

PERSIONAL PROJECTS

- BIKE SECURITY AND CONTROL SYSTEM

TYPE- (Internet of Things)

This project introduces a novel device designed for enhancing bike security and functionality through integrated electronic components. The device incorporates a GPS module for real-time location tracking, I can also control bikes ignition and siren using mobile application, SIM800 module enables communication capabilities, allowing the device to send notifications using airtel calling card, to control all the electronic devices I used Arduino UNO R3 and programmed it using Arduino IDE using C++. [Github](#)

- Video Library

Developed a complete full stack project using HTML, CSS, Typescript, React, Bootstrap as front end and MongoDB, NodeJS, ExpressJS as backend. In this project, an admin can upload the videos and can have control over the videos like Create, Read, Update, and Delete. On the other hand, users can register or login to access the videos.
